That is the Overland.

They don't build o dy 5/5/4 of them, not even 10 000

If they produced no mo e that that number of ears they
too, would have to ask at least \$1300 for the beautiful ear
we often at \$985.1. O B. Toled.)

They build 40,000 ears this season. They cont a t for the law material for discontinuous pounction at or-time, pay for it in each and thereby receive the best the markets afford, at the lovest pieces

The price include everything needed for comfort able towing, activen engine strict, its tank, fit and oil lamps, genuine moisin op ind tep envira? the tive on, ram vision windshield, Warner speed note, his noveleral, footrest, tile carries in the rear of the engine.

The Overland mo or is the best of its type. Some

mo ore-ims is an unportant point-have three main bear into ne time to an unportant point—anve turce main ocar-ins, some only two. Overland mutors have five large main bearings, that's one of the reasons why they work we have trouble. The whole motor is built for power and

The Overland model 69 rear axle is of a new and improved type, three quarter floating; this axle system has able acres ant ges of the fell-floating axle, but none of the of or comings of the semi-floating axic usually found in curs of moderate price

the brakes are of new design, overlarge, gradual powerful in application. They will hold the car

In Overland cars the transmission is combined with the ten axic and the drave is in a straight line. Both these features make for saving of engine power and smooth and qu et running

Come and take a look at it Compare it with others
Take a ride in the big, fully equipped Overland, it involves
no obligation on your part. Then draw your own conclusions. I hat's all
